Long Distance Telephone, Mobile, Ala.:

DAY, 6-1727 — NITE, 6-9863

SHIPPING POINT, MOBILE, ALA.

TERMS AND CONDITIONS OF SALE

PRICES: 5, 50, and 500 of same variety and size at 10, 100 and 1,000 rates, respectively. When the price of a single plant is not listed under "EACH" add 25% to the 10 rate. All quotations are for immediate acceptance and subject to prior sale.

SPECIMEN STOCK, selected or marked by our customers at our nurseries, will be priced at its value.

CARLOAD ORDERS on B & B plants (or if trucks are sent to our nurseries for them, and we do not have to pack the plants) will be very attractively priced.

TERMS of PAYMENT: CASH WITH ORDER, 2% discount and free boxing, which means a total saving of about 10%. As our banks charge exchange on out of town local checks, please remit in New York Exchange or Post Office Money Order.

C. O. D. shipments will be considered as cash orders only when cash deposit of 25% is sent with order. For charge accounts, our terms are 60 days net, boxing at cost. New charge accounts will be opened after receipt of trade references, allowing time for investigation.

TRANSPORTATION: Please state whether you want your shipment by parcel post, express, or freight. If no instructions are given, we will use our judgment in shipping. We make no charge for delivery to railroad, but our responsibility ceases when goods are turned over to carrier, and risk and cost of transportation belong to purchaser.

CLAIMS: IF THERE IS ANY MISTAKE OR ANY REASON TO COMPLAIN, PLEASE WRITE IMMEDIATELY UPON RECEIPT OF GOODS AND WE WILL BE PLEASED TO MAKE ADJUSTMENT.

CONDITIONS OF SALE: We accept all orders upon condition that they shall be voidable at our option should any injury befall our stock before shipment from CAUSES OVER WHICH WE HAVE NO CONTROL.

A Z A L E A S

Azaleas are, without doubt, the most beautiful flowering plants we have in the South. Their season of blooming is very long, and they are such profuse bloomers that in the Spring each plant is a solid mass of colors.

All types of azaleas are easily grown, if a few simple rules are followed. They require a good, well-drained soil that has a slight acid reaction. The addition of leaf-mold, peat and, in very heavy, stiff soil, a small quantity of sand, is always beneficial. Leaf-mold and peat help maintain an acid soil, and a mulch of leaves is good to retain moisture and furnish plant-food for the next year.

Azaleas are shallow rooted and require an abundance of water in dry weather, especially the young plants. Watering among the foliage with a hose is desirable, as a strong spray holds thrip and red spider in check.

Partial shade is desirable in planting, but dense shade should be avoided. A lath-house is well suited for growing plants in nurseries. They should be fertilized sparingly; a light application of cotton-seed meal about three times a year is one of the best treatments. It should be remembered that plants having a quantity of large sappy growth produce less flowers and are much more likely to be killed by freezing weather than slower-growing plants of the same variety.

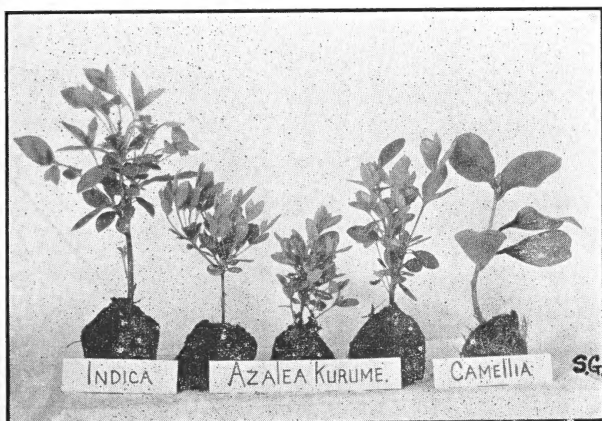

Azalea Lath-House

LINING-OUT size azaleas offered here were rooted last Spring and planted in beds early last Summer, given plenty of space for full development of strong root systems and bushy tops. They are far superior to 3-inch potted plants, having roots enough to fill a 3-inch pot which has twice the capacity of a 2½-inch pot. We have thousands of lining-out size azaleas ready for immediate delivery, but since these

small plants have much tender growth and are easily damaged by cold, we advise protecting them against frost this Winter. The extra expense of frost-protection will be more than repaid by the better growth you will obtain by early planting, but those who are not prepared to protect them will do well to let us book their orders and ship next Spring, after all danger of frost is over. This service is rendered without any additional expense to our customers.

AZALEA INDICA

The INDICA AZALEAS, which are fast growers with masses of large flowers, are especially adapted for landscape planting all along the Gulf Coast and up the Atlantic seaboard to North Carolina. Around Mobile, nurserymen in this entire section have a golden opportunity to give most lasting satisfaction to their customers. Azaleas will sell themselves when your customers see them in full bloom. We are listing the most important varieties, eliminating weaker growers or inferior flowers when the same color can be had in better varieties.

Lining Out Azaleas

COCCINEA MAJOR. Brilliant orange-red, a little taller grower than Prince of Orange.

ELEGANS. Fast and rather upright grower, similar to Formosa, with light-pink flowers. **EARLY BLOOMER** and a **HARDY AZALEA INDICA.** Most nurserymen in this section of the country do not realize how greatly their trade will be stimulated by offering this bright, flowering azalea to their customers.

FIELDER'S WHITE. Large, pure white flowers early in season—a strong grower, free blooming and one of the best whites.

FORMOSA. Very fast grower with large dark green leaves and big purplish-pink flowers which are less purple than Phoenicia.

INDICA ALBA. Rather upright grower, with dull-colored, hairy leaves and pure white flowers in midseason—very hardy.

IVERYANA. Similar to Criterion, but has pink stripes on pure white instead of the pink background of that variety.

PHOENICIA. Fast grower with medium-sized leaves and purplish-pink flowers of a shade that is not often wanted with other colors, but is very nice with white. It will probably withstand more heat and sun than any other azalea.

PRIDE OF DORKING. One of the deepest reds of the entire group. Blooms late in the season and, while not very hardy, is one of the best.

PRIDE OF MOBILE. Fast grower with large leaves; similar to Formosa, but has lighter colored flowers. One of the largest and choicest azaleas. This variety was formerly known as "Watermelon-Pink" but is now called "Pride of Mobile". Very hardy, fast grower; most brilliant in color, profuse mid-season blooming makes this one of the outstandingly good and profitable varieties for nurserymen and florists to handle.

VITTATA FORTUNEI. Fast grower, upright, with pale-colored leaves, white and lavender variegated and light lavender flowers intermixed. Starts blooming in Fall and continues all Winter and Spring.

WILLIAM BULL. Very hardy, upright grower, which will not grow compact when small, but after a few years will assume a nice compact form. Very double orange-red flowers which last a long time. One of the best.

HARDY JAPANESE KURUME AZALEAS

Finest forcing Azaleas for **FLORISTS**

This group, known botanically at *AZALEA OBTUSUM JAPONICUM*, includes varieties that are more dwarf in their habit of growth and hardier than the Indica group. All Kurume Azaleas will stand the Winter of almost all sections of the southern states without any protection. Their popularity

is increasing rapidly as they become better known, especially in the cooler sections of the country where the more tender Indica are injured by the cold. Used singly, or in groups by themselves, or in combination with Indica varieties, they give most pleasing landscape effects and offer a range of color that could not otherwise be obtained.

6 to 8-In. *Kurume Azalea*

The demand for Kurume Azaleas as "POT PLANTS" for florists has been growing by leaps and bounds. When plants are received from us, all you have to do is to pot them in light peaty soil, keep in moderately warm houses, spray with strong force of water daily to keep down red spiders, and they will come into full bloom in about 60 days. They are a very quick and profitable crop. We are now growing thousands of excellent *KURUME AZALEA FOR FLORISTS*, paying particular attention to the leading florists' *VARIETIES*, *SUCH AS CORAL BELLS, SALMON BEAUTY, HINO-DEGIRI, SNOW, HEXE, and DOUBLE MAUVE.*

CHRISTMAS CHEER. Compact grower with small shiny leaves. The flowers, of deepest crimson, are small but very attractive. One of best varieties.

CORAL BELLS. Compact grower with small shiny leaves. The bell-shaped pink flowers are small but very attractive. Very profuse bloomers, and one of the best favorites. Blooming at Christmas, it is one of the most desirable pot-plants.

DOUBLE MAUVE. Compact grower with delicate mauve fading to white in center. Hose-in-hose flowers, very nice pot-plants for Spring.

HEXE (Firefly). Slow, compact grower, with showy, deep scarlet, hose-in-hose flowers. One of the best pot-plants for Christmas.

HINODEGIRI. Slow, compact grower, but its fiery red flowers will literally smother the entire plant, even when very small, making it one of the most desirable pot-plants for Spring.

HORTENSIA. Good-sized soft pink, hose-in-hose flowers are produced in large trusses. One of the best an most desirable pot-plants for April and May.

ORANGE BEAUTY. Compact grower, with orange-pink flowers of hose-in-hose type, and large glossy leaves. Heavy bloomer and good forcer.

PEACH BLOW. One of the fastest-growing Kurume. Medium-sized, single flowers of a delicate peach shade. A heavy profuse bloomer.

PINK PEARL. Large, most beautiful salmon-rose color blooms, shaded lighter toward center, with prominent markings, and borne in large clusters.

SALMON BEAUTY. Large hose-in-hose, salmon-pink flowers and light green foliage. Heavy bloomer and compact grower.

SALMON QUEEN. Large single, salmon - pink flowers are produced in great profusion in mid-season. One of the most attractive Kurumes. Blooms cover entire plants.

SNOW. Pure white, large size hose-in-hose flowers of purest white among beautiful glossy leaves. Easy to force, and fine pot-plants for Easter.

Our Lining-out Azaleas were planted in beds early last Summer to allow plenty of time and space for strong root development. Their root systems equal those of three-inch pot plants. Spring delivery is best for transplanting. We book orders upon receipt of 25% cash deposit.

CAMELLIA JAPONICA

The horticultural names of camellia japonica are so badly confused that we are still not sure of many of them, but we have many varieties which are identified by leading nurserymen under the names we list. Therefore, we are offering these named CAMELLIA JAPONICA in three classes.

Many names, however, have yet to be revised, and in order not to mislead you, we are illustrating several types of flowers, and by referring to these illustrations, you can form a better idea of what we mean by "*PEONY FORM*", "*VERY DOUBLE*", etc.

Victor Emanuel

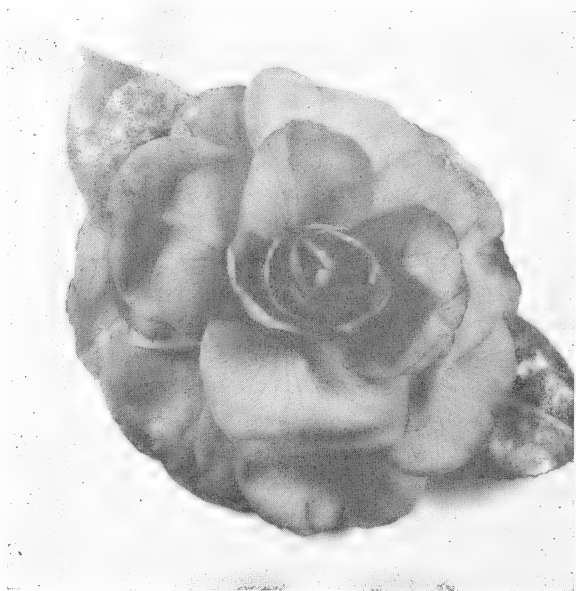

Camellias are not difficult to grow. Many fine old specimen plants are to be found scattered throughout the lower South, where they have been growing for years with little or no care, and thriving on practically all types of land characteristic to the region. However, they do best on a good, well-drained soil that has a slight acid reaction. Good garden soil is suitable, but it can be made better by adding leaf-mold and peat moss. In heavy stiff soils, a small quantity of sand is also beneficial.

In most soils, especially on clay land, cottonseed meal alone, or in a mixture, is an excellent fertilizer. Other good fertilizing materials, which are likewise acid in their reaction, are well-rotted cow-manure, tankage, castor pomace, sulphate of ammonia and muriate of potash.

The Camellia is less subject to disease and insect enemies than most other evergreen shrubs, but sometimes the foliage is attacked by scales. When this occurs, they should be sprayed with a miscible oil preparation and care should be taken to thoroughly wet the underside of the leaves as well as the top. Volk, used in the proportion of 1 part to 50 parts of water, has proven very effective.

Camellias with advanced flower-buds should be kept in a very cool house. Mum, carnation, begonia and cyclamen houses are suitable, with a temperature of not much more than 50 degrees. Camellias are winter-blooming plants and may shed their buds in very warm houses.

Camellia Japonicas are being used more and more as cut flowers by florists. Due to the heavy and increasing demand, we ask that our customers placing large orders specify the varieties wanted before they are sold out. We do not substitute unless requested to do so.

Purple Emperor

CLASS A CAMELLIAS

C. M. HOVEY. In habit of growth, shape and form of flowers, it is very much like Purple Emperor, but the beautiful, double, large red flowers are mottled with white. Very showy.

DAIKAGURA. Probably the earliest bloomer of all **CAMELLIA JAPONICAS.** IS NEARLY ALWAYS IN BLOOM IN SEPTEMBER and often is showing color in August. Flowers are large, thick peony-type. Deep rose color with large white blotches.

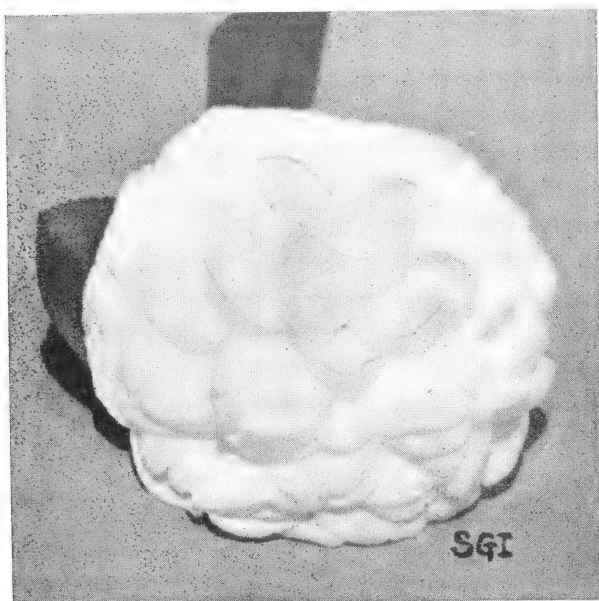

FANNY BOLLIS. Very large, single red flowers blotched with white.

KUMASAKA. Large, peony-form blooms of deep pink. Late bloomer. One of the finest of all pink varieties. When full open some stamens show through the petaloids. A very rare Camellia.

MARCHIONESS OF EXETER. Early, large pink flowers of peony-form similar to Debutante, but a little deeper in color. Blooms from October to February.

NAGASAKI. A magnificent Camellia, with large single blossoms. The large crinkled petals and large carmine red flowers are mottled with white.

LADY CLARE. Immense, single pink flowers. Probably the largest of all Camellias.

Alba Plena

MRS. JULIA THOMPSON. Large, semi-double peony-type of great beauty. Flowers are purple pink. A late bloomer and upright grower.

LADY HUME'S BLUSH. A medium-sized full double. Flowers are blush pink, almost white. **ONE OF THE BEST FOR CUT FLOWERS FOR FLORISTS.**

COLONEL FIREY (William S. Hastie). Very large, extremely double flowers, with many small petals of glowing rich crimson. A late bloomer.

GOVERNOR MOUTON. Flowers of medium size and blood-red color, often blotched with white. A vigorous grower, rather spreading in habit, with twiggy branches.

LADY VAN SITT. Large, semi-double, attractive, deep-pink flowers. Leaves long, narrow-pointed and slightly crinkled. Upright grower and free bloomer in midseason. One of the best for cut flowers.

KELLINGTONIA. Flowers orange-red with stripes or blotches of white, open peony type. Always bloom heavily and have extra good foliage.

We are offering a few Grafted Camellias, 12 to 15 inches, 15 to 18 inches, 18 to 24 inches. Prices upon application.

CLASS B CAMELLIAS

ALBA PLENA. Well-known Camellia. Snow white, very double (one of the best cut flowers for florist's purposes). Very early but a slow grower, and does not set buds when young. 6 to 8 in., 8 to 12 in., 12 to 18 in., and 18 to 24 inch only.

BROOKLYANA. A bushy grower with large, light-colored leaves. Flowers of medium size, very double, pink mottled with white.

CHANDLERI ELEGANS. One of the largest peony-flowering Camellias. Cherry-red, with white variegation. Some flowers are loose peony form with yellow stamens.

HERME. Pink and red variegated with white margin, between semi-double and peony in shape. Has faint scent. One of the most popular, and among the very best.

MONARCH. Deep pink flowers of enormous size. Many petals and stamens in clusters inside of huge outer petals. Peony type, beautiful foliage and compact grower.

PINK PERFECTION. Very double, clear shell-pink flowers of dainty form, liked by many. The plants start blooming when very young, coming early in the season and continuing in profusion for a long time. One of the best for cut flowers.

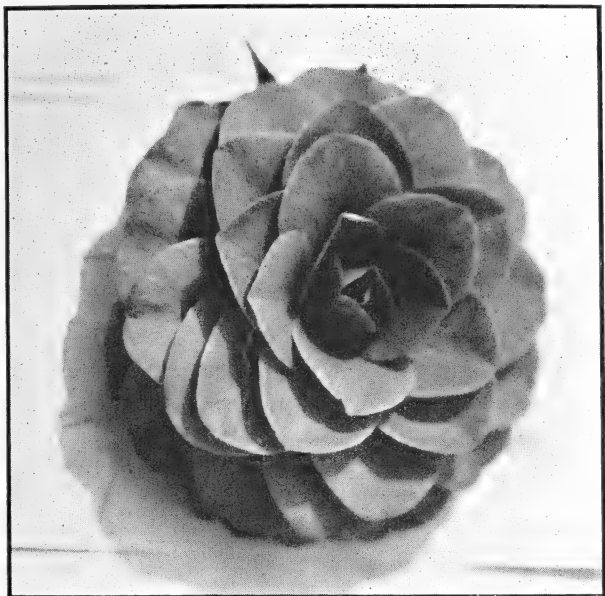

PROF. C. S. SARGENT. Very thick peony-form, solid crimson. Medium-sized flowers.

SEMI-DOUBLE BLUSH. Flowers of elegant shape, with light semi-double petals. Identical color of Lady Hume's Blush. Beautiful yellow stamens. One of the noblest and simplest in form and coloring.

CAMEO PINK. A very lovely Camellia of a soft shell pink. This is an unusual variety. Full double, similar to Otome, but has much larger flowers. One of the best for cut flowers.

Glen 40

RARE CAMELLIA JAPONICAS

We furnish these only in connection with our standard varieties. Only a limited number to a customer. No reduction in price, regardless of size of order. The new and rare CAMELLIAS of today will be the real MONEY-MAKERS of tomorrow. *EVERY GROWER SHOULD HAVE THEM.*

LAURELLEAF. Large, full double flowers with numerous narrow petals having recurved edges and opening very flat; light salmon-rose, marbled white. Upright and compact in habit of growth, rather narrow foliage of a pleasing shade of green. Conspicuously beautiful, and most highly regarded of all varieties of Camellias.

VICTOR EMMANUEL. Camellia collectors should not be without this one. It is a bushy grower, compact and symmetrically round, with medium-sized, ellipticovate leaves. **THE FLOWERS ARE VERY LARGE, DEEP RED PEONY-FORM AND OF INDESCRIBABLE MAGNIFICENCE AND BEAUTY.** Blooms late.

PURPLE EMPEROR (Mathotiana Rubra; Purple Dawn). One of the largest flowers of rose

form. Deep red, but as the flower gets older. the outer edges turn purple.

GLEN 40. An immense, double rose-form flower. The outer edges of which TURN DEEP DUBON-NET as the flower gets Older. When fully Open it shows some stamens in the center; 4 to 6 inches in diameter. The leaves are small, dark green. A very strong upright grower. Blooms in January to February. We consider it our finest and newest variety in Camellias. Available in sizes, 6 to 8 inch, 8 to 10 inch and 2 to 3 feet; Specimen.

CLASS C CAMELLIAS

MRS. ABBY WILDER. Peony-shaped white flowers medium to large, with tiny splashes of pink. Compact and fast grower.

BELL ROSEA. Very double flowers of Pink Perfection shape, of about same size, but color is a deeper pink. Fast and very compact grower, with rather small leaves. Plants 3 feet high usually have spread of same dimension.

CANDIDISSIMA. STAR-SHAPED, very double, pure white flowers. Not large, but a very profuse bloomer. Slow compact grower. Late season bloomer.

COUNTESS OF ORKNEY. Very double light-pink flowers with red stripes, rather early in the season. Compact, but slow grower. Profuse bloomer while very small.

ELIZABETH (Tutonia). Very double pure white blooms. Pink flowers of same form will appear. Thick leaves are very dark green. Strong grower. One of the best for cut flowers.

GLOIRE DE NANTES (*Leana Superba*). Large semi-double, cerise blooms with central petals often twisting. Extremely large dark-green leaves, and bold large flowers make this one of the most attractive bushes. One of the best for cut flowers.

JARVIS RED. Deep blood-red, semi-double flowers with golden stamens. Very attractive among dark green foliage. One of the most popular varieties for gardens.

MATHOTIANA ALBA. Good-sized very double white flowers with large light-colored leaves. rather late in season. One of the best for cut flowers.

BELLE ROMANA. Peony form, light pink petals with small stripes of crimson. Upright grower.

PRINCE EUGENE NAPOLEON (*Pope Pius IX*). Very double scarlet flowers of good size from early to midseason. Good compact grower. One of the best for cut flowers.

RAINY SUN. Twisted, rather narrow leaves. Flowers are large, semi-double and rose-red in color.

ROSE EMRY. Crimson peony-form blooms of medium size early in season.

SARAH FROST. This well-known favorite is a good compact grower and a profuse bloomer. The flowers are full double, of medium size, rose-red in color and produced midseason to late. **VERY DEPENDABLE FOR CUT FLOWERS.**

THERESA MOSSINE. Very narrow, pleasing, shell-pink petals; unusually double. Small leaves. Very compact grower.

CAMELLIA SASANQUAS

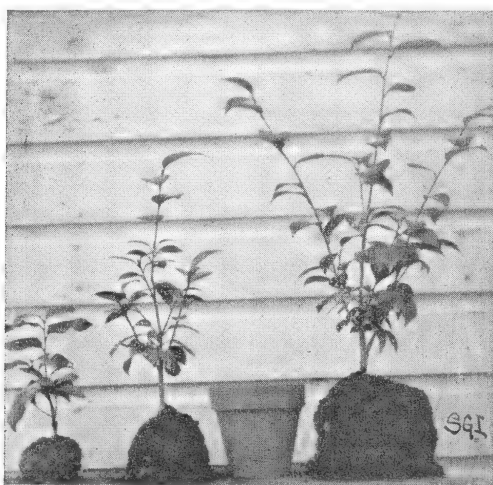

ONE OF THE NEWEST AND FINEST OF ALL THE BROAD-LEAVED EVERGREENS. Similar to Camellia Japonica, but looser and faster growing. Very profuse bloomers, the flowers commencing to open the latter part of September and continuing on through November, at a time when very few bloomers can be had. From many thousands of seedling plants, we have a few outstanding varieties which we offer by name in the following list:

CLEOPATRA. Large, beautiful cherry-red flowers. often double, and having crinkled petals. Foliage thick, dark and glossy. A vigorous and compact grower.

MINE-NO-YUKI. Double white, similar to Carnation. Has scent and blooms freely at an early age.

ROSEA. DEEP PINK. Large single upright grower.

SHELL PINK. Large single, fast grower.

6-8, 8-12 and 18-24 In. Bed-Grown Camellias

ORIENTAL MAGNOLIAS

These deciduous magnolias are among the most beautiful flowering trees in the world. Most of them are hardy in nearly all parts of the United States, and planting of these beautiful trees should be encouraged by nurserymen, especially when they can be had at such reasonable prices as we list below.

SOULANGEANA. Small trees with large, 9-petal pinkish flowers before the leaves appear in the Spring. One of the most beautiful of all flowering trees.

SOULANGEANA ALBA SUPERBA. Similar to above with almost pure white flowers of large size. Rounded leaves and more upright growers.

SOULANGEANA NIGRA. Bloom later than Soulangeana and are darker in color.

LILIFLORA (Magnolia Obovato). Tulip-shaped, large purplish-pink flowers before leaves appear. Many stems from ground. Make large bushes.

RUSTICA RUBRA. Large cup-shaped, dark reddish-purple flowers. A great new addition, similar to Lennei, with handsome SEED-PODS more than 6 inches long.

STELLATA (Star Magnolia). A dwarf grower with numerous delicate pinkish-white daisy-like flowers early in Spring. One of the most beautiful of all.
